GARDENA Water Control Flex

Translation of the original instructions.

For safety reasons, children and young people under 16 as well as anyone who is not familiar with these operating instructions should not use the product. Persons with reduced physical or mental abilities may use the product only if they are supervised or instructed by a responsible person. Children must be supervised to ensure that they do not play with the product. Never operate the product when you are tired, ill or under the influence of alcohol, drugs or medicine.

Intended use:

The GARDENA Water Control is intended for private use in domestic and hobby gardens, exclusively for outdoor use, to control sprinklers and watering systems. The Water Control can be used for automatic watering during holidays.

DANGER! The GARDENA Water Control must not be used for industrial purposes or in conjunction with chemicals, foodstuffs, easily flammable and explosive materials.

1. SAFETY

Important!

Read the operator's manual carefully before use and keep for future reference.

Battery:

To ensure the Water Control runs safely, only a 9V alkaline manganese battery (alkaline) type IEC 6LR61 must be used!

In order to stop the Water Control from failing because of a weak battery if you are away for a long time, the battery must be replaced when the battery symbol flashes.

Setting up:

The Water Control may only be set up vertically with the sleeve nut to the top to prevent water

penetrating into the battery compartment. The minimum water output to ensure that the Water Control functions correctly is 20 – 30 l/h. For example, at least 10 x 2-litre Drip Heads are required to control the Micro-Drip-System.

At high temperatures (over 70 °C at the display) the LCD display may extinguish. This does not affect the program in any way. When the computer cools down the LCD display illuminates again.

The max. temperature for the water flow is 40 °C.

Avoid tensile strain.

→ Do not pull the hose connected to the Water Control.

CAUTION! If the control section is removed when the valve is open, the

valve remains open until the control section is reattached.

DANGER! Cardiac arrest!

This product makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants. To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the medical implant manufacturer before you operate the product.

DANGER! Risk of suffocation!

Small parts can be easily swallowed. There is also a risk that the polybag can suffocate toddlers. Keep toddlers away when you assemble the product.

2. INITIAL OPERATION → (Fig. A–D)

A video of the commissioning and setting processes is available here:

3. FUNCTION → (Fig. F)

The settings can be adjusted when the control panel is removed. You can change the settings or move to the next setting by turning the outer wheel. Pressing the (✓) button confirms the respective input. Pressing the button for a minimum of 3 seconds locks or unlocks the display.

- * max. 1 year
 min. 4 weeks
 max. 4 weeks

too weak for opening again
 If you will be away for long periods of time, please replace the battery when the battery symbol blinks – otherwise the watering system may fail.

4. PROGRAMMING → (Fig. G-I)

Fig. G: 1 Set time (hours) | 2 Set time (mins) | 3 Select schedule | 4 Confirm schedule

Please note: If starting in the past and at a frequency of 4, 6, 8, 12 hours, the start time will be automatically adjusted after input.

Watering tip: For pot plants that required small amounts of water at regular intervals, short watering cycles are ideal in combination with a drip irrigation system.

The saved watering schedule can be activated or deactivated by pressing ON/OFF.

Fig. I: 1 Active watering | 2 Change watering duration | 3 Stop active watering at any time

By pressing the (☔) button, manual watering can be started or stopped at a desired time (see fig. I).

Soil Moisture Sensor → (Fig. D and H):

After a soil moisture sensor is connected, the word "Sensor" will be displayed – this can take up to 1 minute.

Once the soil is sufficiently moist, a watering operation is interrupted or a schedule is disabled so that it cannot be activated. This does not affect active (manual) watering.

Soil Moisture Sensor, Art.1867 (optionally available)

1 Connecting the sensor

An operating point must then be defined. This is the soil moisture level at or above which

watering is not to be carried out (see GARDENA Soil Moisture Sensor Operating Instructions). There are 3 levels to choose from.

- During normal operation, the currently measured level is displayed constantly.
- The switching point as of which the sensor signals that the soil is moist – thereby preventing watering – is selected via the number of levels.
- 0 dots for loamy soil
 - Sensor response when soil is quite dry.
- 3 dots for sandy soil
 - Sensor response when soil is very moist.

**Soil Moisture Sensor, Art. 1188,
(optionally available,
models up to 2020)**

The soil moisture level at which a watering will not be carried out as per the schedule can be set using the switching point controller on the soil moisture sensor (see GARDENA Soil Moisture Sensor Operator's manual).

5. MAINTENANCE → (Fig. E)

6. STORAGE

To put into storage:

- The product must be stored away from children.
- To preserve the battery, it should be removed (fig. B).
- Store the controller and the valve unit in a dry, enclosed and frost-free place.

Disposal: (in accordance with RL2012/19/EC)

The product must not be disposed of to normal household waste. It must be disposed of in line with local environmental regulations.

IMPORTANT!

Dispose of the product through or via your municipal recycling collection centre.

Disposal of the battery:

- Please return a flat battery to a GARDENA dealer or dispose of it properly at your nearest recycling centre.

Dispose of the battery only when discharged.

10. SERVICE/WARRANTY

Service:

Please contact the address on the back page.

Warranty statement:

In the event of a warranty claim, no charge is levied to you for the services provided.

GARDENA Manufacturing GmbH grants a warranty for all original GARDENA new products for two years from the date of original purchase from the retailer, provided that the devices have been for private use only. This manufacturer's warranty does not apply to products acquired second hand. This warranty includes all significant defects of the product that can be proved to be material or manufacturing faults. This warranty is fulfilled by supplying a fully functional replacement product or by repairing the faulty product sent to us free of charge; we reserve the right to choose between these options. This service is subject to the following provisions:

- The product has been used for its intended purpose as per the recommendations in the operating instructions.
- Neither the purchaser nor a third party has attempted to open or repair the product.
- Only Original GARDENA replacement parts and wear parts have been used for operation.

- Presentation of the receipt.

Normal wear and tear of parts and components (such as blades, blade fixing parts, turbines, light bulbs, V-belts/toothed belts, impellers, air filters, spark plugs), visual changes, wear parts and consumables are excluded from the warranty.

This manufacturer's warranty is limited to replacement and repair of products in accordance with the abovementioned conditions. The manufacturer's warranty does not constitute an entitlement to lodge other claims against us as a manufacturer, such as for damages. This manufacturer's warranty does **not**, of course, affect statutory and contractual warranty claims against the dealer/retailer.

The manufacturer's warranty is governed by the law of the Federal Republic of Germany.

In case of a warranty claim, please return the faulty product, together with a copy of the receipt and a description of the fault, with postage paid to the service address.

Consumables:

Faults which occur as a result of incorrectly installed or leaking batteries are not covered by the guarantee.

Damage caused by frost is not covered by the warranty.

EN Product liability

In accordance with the German Product Liability Act, we hereby expressly declare that we accept no liability for damage incurred from our products where said products have not been properly repaired by a GARDENA-approved service partner or where original GARDENA parts or parts authorised by GARDENA were not used.

SV Produktansvar

I enlighet med tyska produktansvarslagar förklarar vi härmed uttryckligen att vi inte åtar oss något ansvar för skador som orsakas av våra produkter där produkterna inte har genomgått korrekt reparation från en GARDENA-godkänd servicepartner eller där originaldelar från GARDENA eller delar godkända av GARDENA inte använts.

DA Produktansvar

I overensstemmelse med den tyske produktansvarslav erklærer vi hermed udtrykkeligt, at vi ikke påtager os noget ansvar for skader på vores produkter, hvis de pågældende produkter ikke er blevet repareret korrekt af en GARDENA-godkendt servicepartner, eller hvor der ikke er brugt originale GARDENA-reservedele eller godkendte reservedele fra GARDENA.

FI Tuotevastuu

Saksan tuotevastuulain mukaisesti emme ole vastuussa laitteiden vaurioista, jos korjauksia ei ole tehnyt GARDENAn hyväksymä huoltoliike tai jos niiden syynä on muiden kuin alkuperäisten GARDENA-varaosien tai GARDENAn hyväksymien varaosien käyttö.

ET Tootevastutus

Vastavalt Saksamaa tootevastutusseadusele deklareerime käesolevaga selgesõnaliselt, et me ei kanna mingisugust vastutust meie toodetest tingitud kahjude eest, kui need tooted ei ole korrektselt parandatud GARDENA heakskiidetud hoolduspartneri poolt või kui parandamisel ei ole kasutatud GARDENA originaalosi või GARDENA volitatud osi.
